

Product Specifications

Product Name: High heat pro-environment stabilizers

Product Aspect: white or yellowish powder

Product Model: RT-500D

Product Features:

- 1、 The pro-environment stabilizers can promote plasticizing strongly which can effectively reduce about 10 °C of the processing temperature. So that it could save energy and reduce the wear of machine screw.
- 1、 The pro-environment stabilizers own an excellent initial coloring and heat resistance, and good surface brightness of products
- 2、 The pro-environment stabilizers own a good electrical insulation, and it's waterproof and oil-proof.
- 3、 The pro-environment stabilizers own good properties of anti-oxidation, anti-aging and weathering resistance. The white and light-colored products do not fade, and its color is stable.
- 4、 The pro-environment stabilizers applies to the wire and cable of GB90- II and VDE-V2V2 , and the Congo red time is more than 240 minute.

Product application:

The pro-environment stabilizers can be used for the product which complies with high heat requirements of the GB90 - II type and the VDE - V2V2 type.

Recommended Dosage: The pro-environment stabilizers use volume 8~10 per 100 PVC

Standard:

According to the third party international specification, the product conforms RoHS, PAHs(18 items), Phthalates(21 kinds), PFOS/PFOA, NP, BPA, REACH-SVHC.

Product Storing:

Advice to put the product in dry and draft chamber. Please using up asap once package opened

Product Packaging: 25kg / Package (PE intima bag)
