

Product Specifications

Product Name: Pro-environment stabilizers

Product Aspect: white or yellowish powder

Product Model: RT-702

Product Features:

- 1、 The pro-environment stabilizers own self-slip, good fluidity and excellent processing performance so that can be applied to harder process conditions.
- 2、 The pro-environment stabilizers own a unique structure, excellent heat-proof. It can effectively inhibit the thermal decomposition of PVC and absorb the HCl strongly.
- 3、 The pro-environment stabilizers own an excellent initial coloring and late heat resistance, and it has a good weather resistance in the later age.
- 4、 The products have a good printing and strong adhesion with the ink, which have no inking undesirable phenomena in the high and low temperature environment.
- 5、 The pro-environment can be applied to different formulations of systems, and the products have no spray frost and precipitation phenomenon and also no sulfuration contamination.
- 6、 The pro-environment stabilizers have a good reinforcing effect for PVC, and its tensile strength is good after aging.
- 7、 The pro-environment stabilizers own excellent antioxidant capacity and odorless.

Product application:

The pro-environment stabilizers can be applicable for all kinds of light-colored polyvinyl chloride (PVC) rolling film, leather/oxford cloth and so on.

Usage and Dosage:

Application	PVC(phr)	Plasticizer (phr)	RT-700 (phr)	Lubricant	Pigment and other
rolling film	100	24-50 above	2-4	right amount	The user to adjust
leather / oxford cloth	100	24-50 above	1-3	right amount	The user to adjust

Standard:

According to the third party international specification, the product conforms EN71-3, RoHS, PAHs(18 items), Phthalates(21 kinds), PFOS/PFOA, NP, BPA, REACH-SVHC.

Product Storing:

Advice to put the product in dry and draft chamber. Please using up asap once package opened

Product Packaging: 25kg / Package (PE intima bag)
